

SAT Documentation

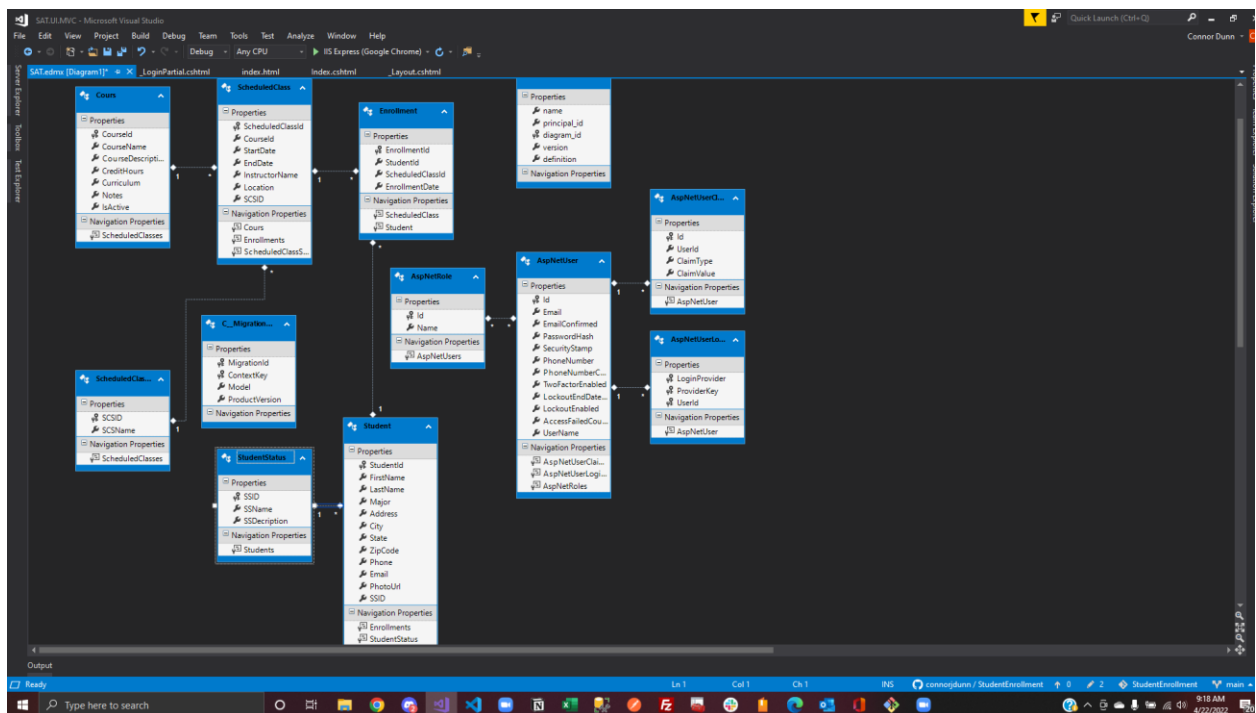

- Our first step was to create a scrum board that both team members could access and modify

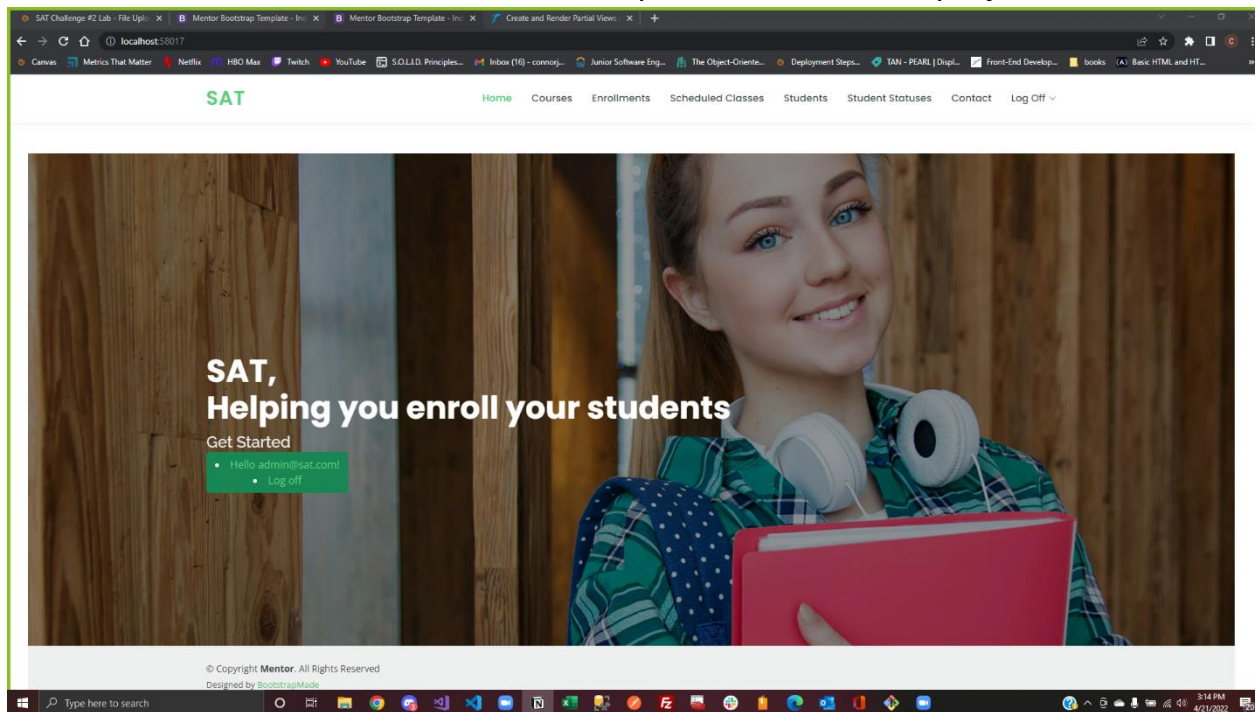

- Next we created a GitHub Repository

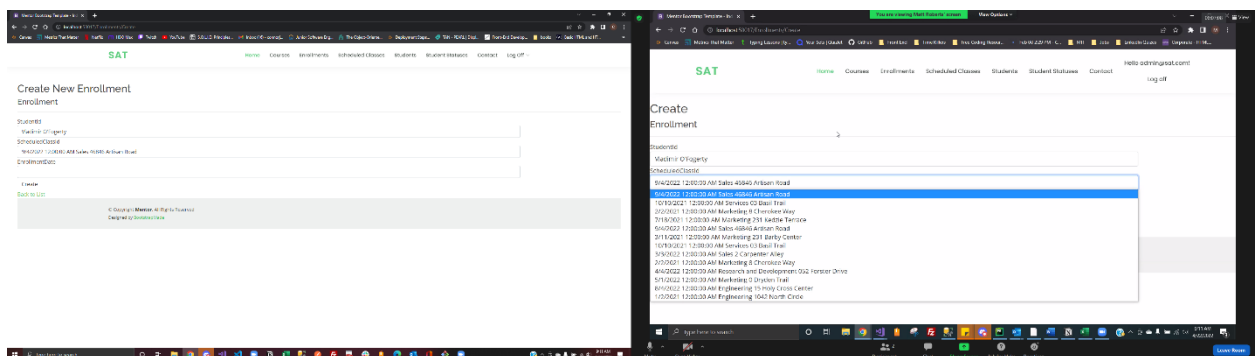

- We then created a database in SSMS

- We created controllers and views to the specifications of the project rubric

- Below is where we added custom properties to the Students page to display their full name, and on the enrollments page inside of the “create new” functionality

- Here we added a file upload functionality so our users could add images

The screenshot shows a web browser window displaying a student profile form. The form has the following fields:

- Major: Business Development
- Address: 31 Summerview Alley
- City: Saint Augustine
- State: FL
- ZipCode: 33252
- Phone: 904-154-3232
- Email: apaszak3@homestead.com
- SSID: NULCurrent StudentL
- PhotoUrl: (Image of a person)

Below the PhotoUrl field, there is a 'Choose File' button and a 'No file chosen' message. A 'Save' button and a 'Back to List' link are also visible. The footer of the page includes copyright information: '© Copyright Mentor. All Rights Reserved. Designed by BootstrapMade'.

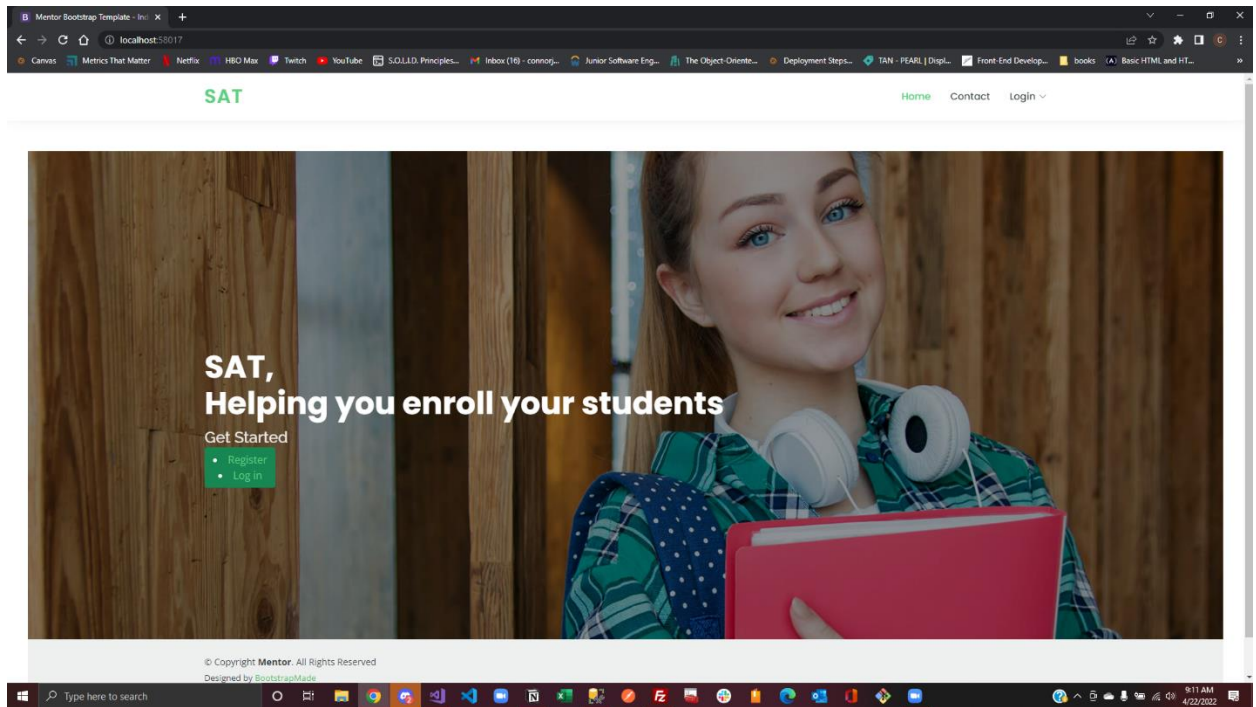

- We made sure to update our scrum board while we progressed through each sprint

The screenshot shows a Notion workspace with a page titled 'Student Enrollment'. The page features a Kanban board with the following columns and tasks:

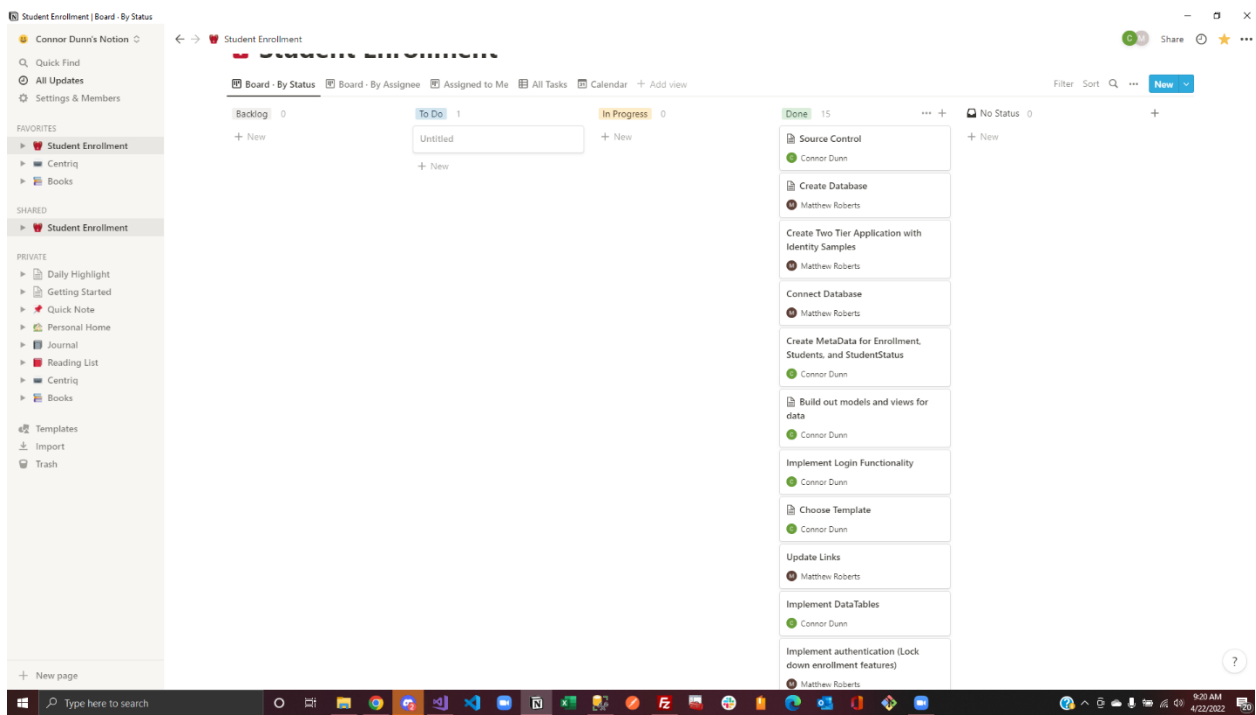

- Backlog (1):**
 - Implement Logic to control the enrollment of students into classes
- To Do (1):**
 - Implement authentication (Lock down enrollment features)
- In Progress (2):**
 - Choose Template (Assigned to Connor Dunn)
 - Implement DataTables (Assigned to Connor Dunn)
- Done (7):**
 - Source Control (Assigned to Connor Dunn)
 - Create Database (Assigned to Matthew Roberts)
 - Create Two Tier Application with Identity Samples (Assigned to Matthew Roberts)
 - Connect Database (Assigned to Matthew Roberts)
 - Create MetaData for Enrollment, Students, and StudentStatus (Assigned to Connor Dunn)
 - Build out models and views for data (Assigned to Connor Dunn)
 - Implement Login Functionality (Assigned to Connor Dunn)
- No Status (0):** (Empty column)

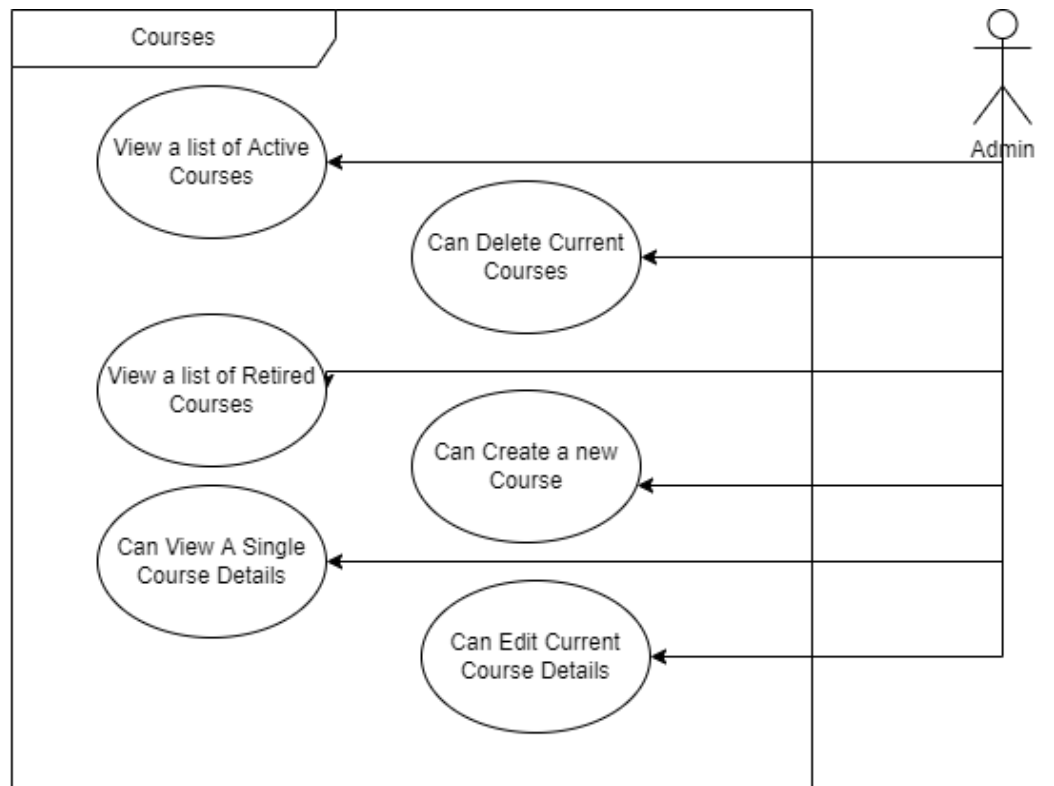

The left sidebar shows the 'Student Enrollment' page is selected under the 'FAVORITES' section. The bottom of the screen shows the Windows taskbar with the time 1:22 PM on 4/20/2022.

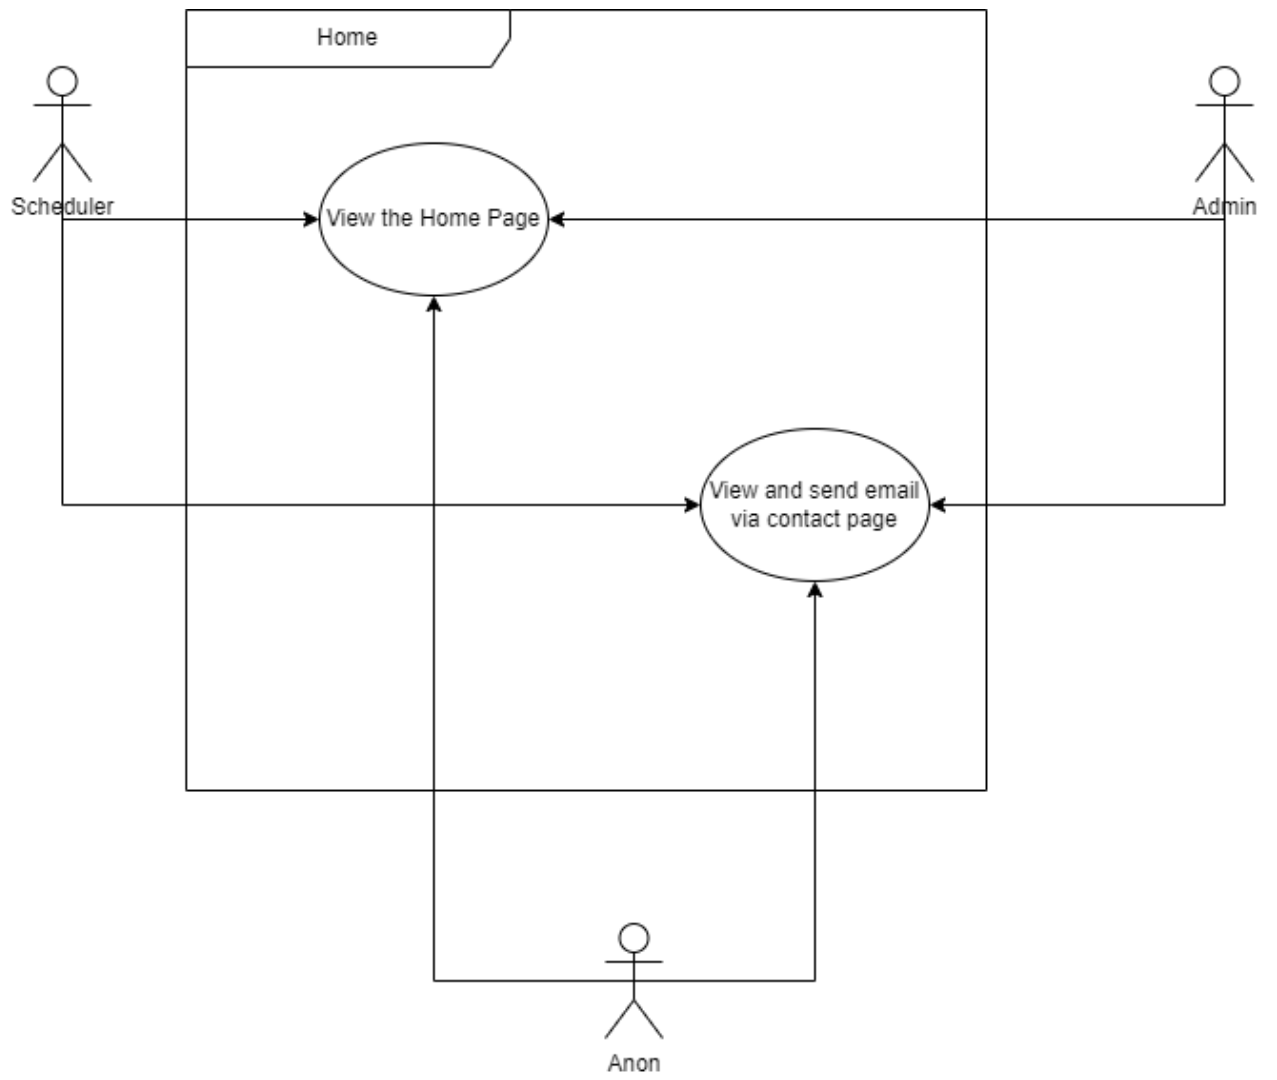

- We made sure to add authentication and lock down certain features that only admins/schedulers should be able to access (ex. Nav Bar links)

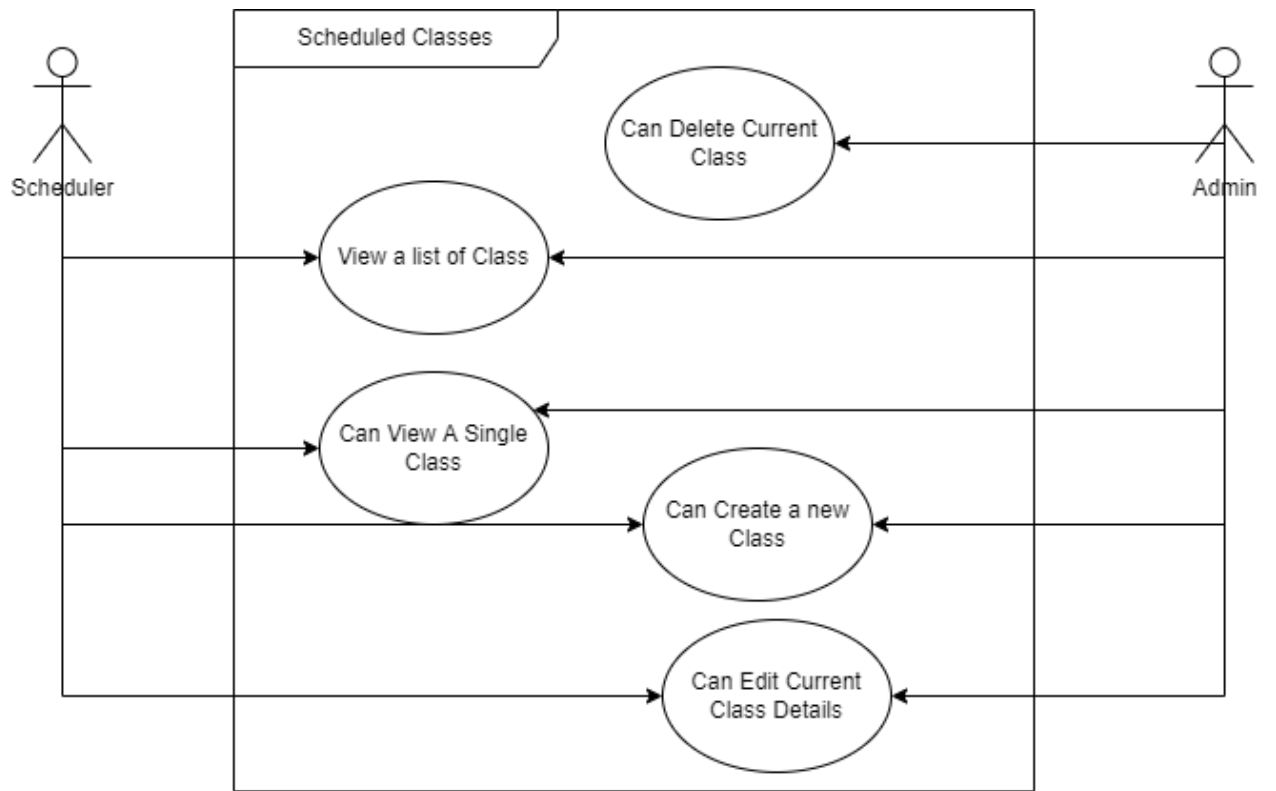

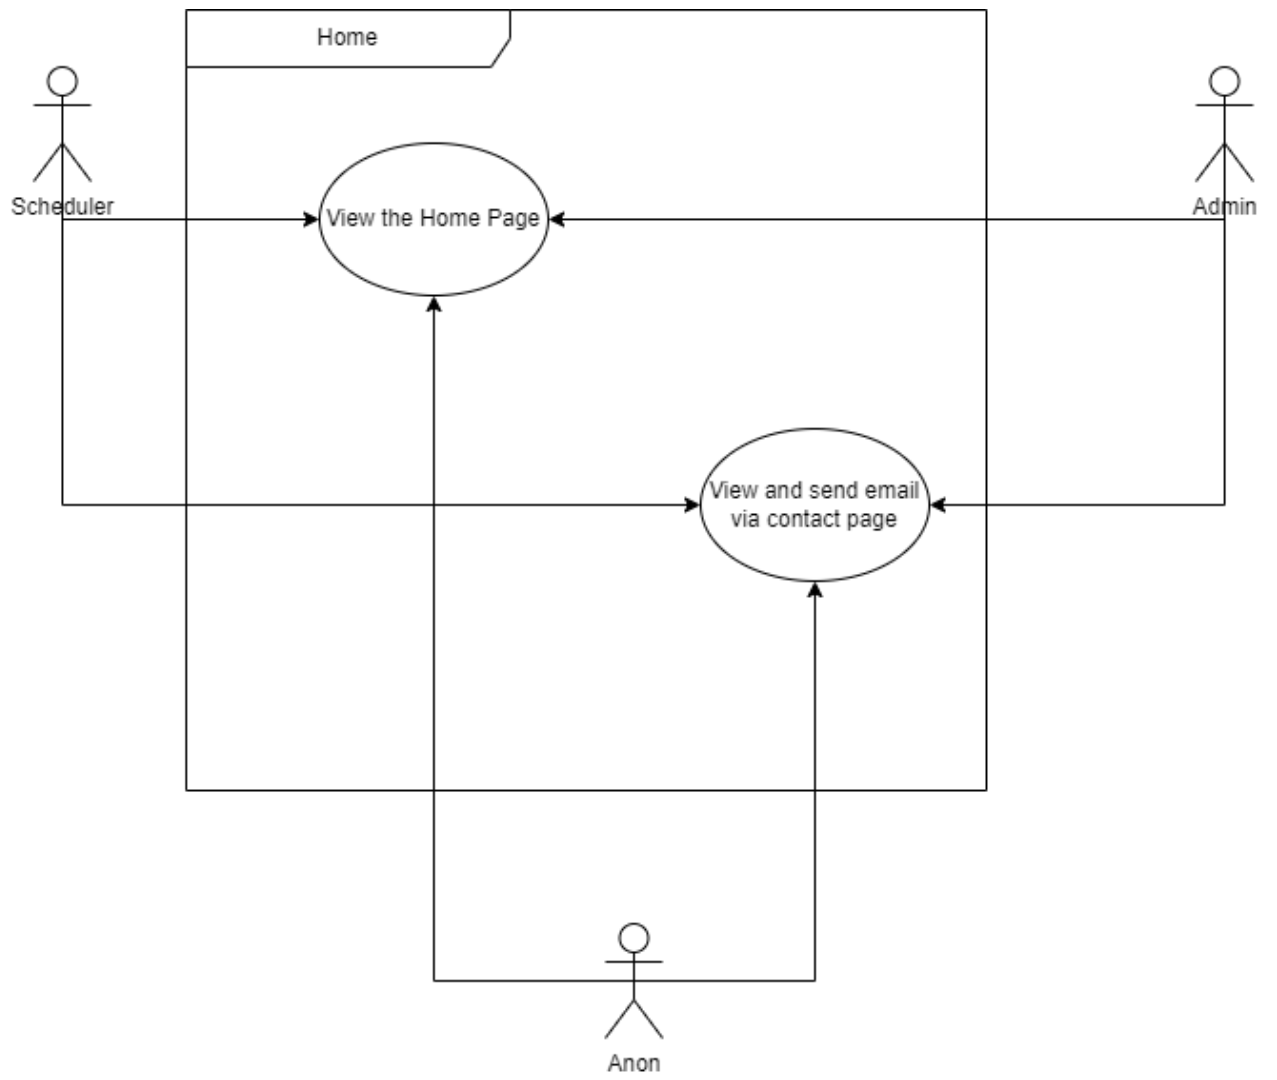

- Once we were finished we made sure to double check our board
